

MULTI-SPEED 2K PAINT ACCELERATOR MMA1

Description:

MULTI-SPEED is a 2k paint accelerator that is formulated using the same chemical components as the MULTI-CURE hardeners. This additive can be added to the hardener. It is not advised that this is added to Fast or extra fast hardener as too much Accelerator can cause severe issues with the curing of the 2K product. It is best used with Standard hardener as this will naturally convert the Standard speed to a faster speed

Preparation	N/A
Mixing Ratio	Below results are ratios to convert standard MULTI-CURE Hardeners 1L hardener : 10ml accelerator = Fast 1L hardener : 30ml accelerator = Extra Fast
Storage	Keep tightly sealed and in a cool place
Flash off time	N/A
Testing	It is recommended that a test card is carried out before painting the substrate. Ensure the desired speed is acceptable and no defects have shown
Handling	N/A
